Good Afternoon Tim,

Please find the attached responses to your request for information per Eric's commitment on last week's conference call. I was under the impression (based on the context of your email and follow-up conversations) that the questions provided were addressed during the in-person site visit on September 27th. I apologize for the delay and misunderstanding.

The underlying theme I perceive from many of your questions in the attached and other conversations is the impression that construction documents should be fully prepared at this point. Per the attached IHS Project Management Guideline (see also the response to question v), the HAMP is not at the Construction Documents Phase yet since it has not been funded.

There also seems to be some confusion about the plan set that was provided. The plan set does not change the design per the 2014 PER nor supporting documentation. The intent of the plan set was to consolidate data, correct errors, annotate facilities better, and to identify discrete scopes (e.g. PHASE B, PHASE C, etc.) that could be used in phasing discussions. Please see previous email dated 8/29/2017 titled "RE: HAMP Consolidated Preliminary Plan Set" for more information on the intention of the plan set. At this time I am unsure what HUC wants to do with the plan set, so that may be a good discussion for next week's conference call.

Thanks,

Jesse

Sure James,

Let's plan to meet at the Cultural Center at 09:30 AM tomorrow morning Hopi time.

I like to present projects with the flow direction beginning at the source, like a life size PI& FD . But they may request a loop?

The attached questions are anticipated.

We are very grateful for your help tomorrow.

Thanks.

Subject: Site Visit Tomorrow

Tim,
Erwin and I will be there tomorrow. Can we meet at the Cultural Center at a time that meets HUC's intended schedule? Maybe we can ride over to the wells together so that we may look point out things along the way. What do you think?

Thanks,
James
